January 10, 2000

**Inquiry:** (1) Is there any special license required for the set-up and instructions on the delivery of an at home nebulizer for a child/infant? (2) Is there any special license required for the set-up and instruction of a bilirubin light for an infant that is jaundice?

**Response:** The RCB classifies the tasks you listed as follows:

Set-up & Instructions for Home Nebulizer for a Child/Infant: Classification 1A; which is nearly verbatim from the Respiratory Care Practice Act.

Set-up and Instruction of a Bilirubin Light: Classification 2. There is no prohibition for this activity in the Respiratory Care Practice Act or its regulations; that is, the Respiratory Care Board is mute on this matter.

Please see Business and Professions Code Section 3702 for more information.
